Subject: ACHD Updates: Liberty Pultrusion (expired permit) and Invenergy (permit appeal)
Attachments: 2021.11.04 CAC, PennFuture, MWA Notice of Appeal Papers with Permit 0959-I001 for Invenergy AEC (final).pdf

Importance: High

Hi Mary Cate,

I had my regular call with JoAnn today and wanted to alert you to two things:

1. Liberty Pultrusions: the facility's title V expired on Wednesday November 3. **Ex. 5 Deliberative Process (DP)**

Ex. 5 Deliberative Process (DP)

2. Invenergy: ACHD issued the major NSR permit for this power generation facility on October 5th. There was significant public interest and we also submitted permitting and modeling comments. Clean Air Council, PennFuture, and Mountain Watershed Association have appealed the NSR permit with ACHD (see attached). Of note is the appeal specifically raises environmental justice concerns and the lack of an alternative analysis as required by 25 Pa. Code § 127.205(5) to determine if the benefits of this project significantly outweigh its environmental and social costs (this is the PA code section that mirrors the CAA NANSR requirement text).
